Outline

- 1 Introduction from files
- 2 Why?
- 3 Just do it!

Downloads

```
$ git clone https://github.com/davidam/davidam.github.io
```

A beamer file is a latex file

```
$ cd ~/git/davidam.github.io/presentations  
$ more beamer.tex
```

An orgmode file can be a beamer file with wiki
syntax

```
$ cd ~/git/davidam.github.io/presentations  
$ more beamer.org
```

- 3 Just do it!

Why is a good idea make slides with latex or wiki syntax?

- ▶ ☒ Version Control
- ▶ ☐ I'm using ssh
- ▶ ☐ Divide visualization and structure is for winners!
- ▶ ☒ Good support for equations

What advantages is adding emacs orgmode to latex beamer

- ▶ ☒ Good navigation
- ▶ ☒ Reproducible research

Outline

- 1 Introduction from files
- 2 Why?
- 3 Just do it!

I want export my beamer.org

From GNU/Emacs to pdf

```
M-x org-beamer-export-to-pdf
```

From shell to html

```
$ latex2html beamer.tex
```

Themes by example

Take a look to the matrix between beamer color theme and beamer theme. Some examples

- ▶ ☐ Madrid
- ▶ ☒ beamerthemeKansaiDebianMeeting

Give me a reproducible calculus
